

**FULL-DAY VOCATIONAL COURSE ON
TCP T3-RSE SUPERVISION IN STEEL AND JOINTING**

Organized by
W Consultants Limited

Supported by
Hong Kong Institute of Steel Construction

Date:	7 November 2020 (Saturday)
Venue:	Rm 1202, 12/F, 25 Kimberley Road, Tsim Sha Tsui, Kowloon
Time	8:45 am (registration) for 9:00 am to 5:45 pm

Scope and Objectives

The commonly used processes for joining steel materials are welding and bolting. As proper jointing works attribute to the structural safety of building works, structural design, material conformance and fabrication workmanship to specifications are essential under the Buildings Ordinance.

The Code of Practice for The Structural Use of Steel 2011 stipulates the requirements of essentials of jointing.

This vocational course is more technically oriented and is tailor-made for building practitioners, particularly Technically Competent Persons (TCP-T3) under the RSE stream of the Supervision Plan System, to refresh them with the basic knowledge and essentials in the supervision of steel materials and jointing aspects so as to safeguard their liabilities as well as their RSEs'.

The course will be delivered by Ir Dr CHAN Wai-tai, who worked in Buildings Department previously and is now setting up his own practice as Registered Structural Engineer (RSE). Dr CHAN acquired his PhD in Fracture Mechanics and Metal Fatigue of steel and is profound in the structural use of steel in steel materials, welding and bolting as stipulated in the Code of Practice for the Structural Use of Steel. He serves HKISC as the Vice President of the Hong Kong Institute of Steel Construction (HKISC) and the Chairman of the Welding Group, HKISC since early 2000s. He himself is delighted to share his in-depth knowledge and work experience so as to highlight inadvertent negligence often committed and to protect their legal liabilities.

Official Language

English will be the official language medium of the vocational course.
